

## Wheel Terminology

**Bolt pattern** or **lug pattern** or **bolt circle** is determined by the number of bolt holes and the bolt circle diameter.

**Hub Diameter** or **center bore** is the hole at the center of the wheel.

**Rear spacing** or **back spacing** is the distance from the backside of the wheel mounting pad to the outside of the rim flange.

**Offset:** The distance from the centerline of the wheel to the mounting surface of the wheel.

**Negative offset:** When the back of the bolt pad is closer to the inside of the wheel; when mounting surface is inboard of the rim centerline.

**Positive offset:** When the back of the bolt pad is closer to the street side of the wheel; when the mounting surface is outboard of the rim centerline.
